

PRESS RELEASE

kilibee.com launches Type - a productivity tool for typing with all keys

Type speeds up writing on the iPad by providing instant access to all characters

Munich, August 10, 2010

Kilibee Type speeds up writing by providing a writing environment with complete keyboard, that provides access to numerous special characters, accents and symbols. The symbol and number keyboard allows the use of numerous symbols in the text, that are not within reach with the standard keyboard. All symbols are pure text, that can be sent as an e-mail, or copied to nearly all text processing iPad applications.

Type contains keyboards in English, German, French, Spanisch and Dvorak layout, plus numerous UTF symbols and a numeric block.

Type is available through the iTunes store for a price of 0,99 US\$:

<http://itunes.apple.com/us/app/kilibee-type/id384261989?mt=8#>
